1. Introduction

Seven major Workshop Streams and their associated sub-sessions provided a major part of the substantive technical discussions at the World Parks Congress in Durban in September 2003. For three full days close to 2,800 participants attended seven major workshop streams and the many associated sub-sessions and short courses. The streams were:

- Workshop Stream I: Linkages in the Landscape & Seascape
- Workshop Stream II: Building Broader Support for Protected Areas
- Workshop Stream III: Governance of Protected Areas
- Workshop Stream IV: Developing the Capacity to Manage Protected Areas
- Workshop Stream V: Evaluating Management Effectiveness
- Workshop Stream VI: Building a Secure Financial Future
- Workshop Stream VII: Building Comprehensive Protected Area Systems

Issues related to three cross cutting themes - Marine Protected Areas, World Heritage and Communities and Equity - were integrated into each workshop stream.

General feedback on the effectiveness of the workshops streams was obtained through the overall Congress evaluation questionnaire and from interviews with participants. Detailed feedback on the profile of workshop participants and on their perceptions of how well the workshops addressed their objectives was obtained from evaluation questionnaires administered in each workshop stream as well as most of their associated short courses.

A summary of the evaluation results for each workshop stream appears in the overall Evaluation report. This report contains both the summary of overall workshop evaluation results (Section One) as well as the complete evaluation results for Workshop Stream II: Building Broader Support for Protected Areas (Section Two) and the results of the Short Course evaluation associated with that workshop stream (Section Three).

This detailed report is provided mainly for use by the respective Workshop Stream Leaders and associated managers and organizers who may find the complete data analysis useful in reflecting on how well they met their objectives and what improvements they might wish to make for future Congress workshops.

Section One: Overall Workshop Results

Section Two: Specific Workshop Evaluation Results for Workshop Stream II: Building Broader Support for Protected Areas

Section Three: Short Course Evaluation: Strategic Participatory Communications
2. Overall Workshop Evaluation Results

This section reports on the overall effectiveness of the workshop streams. In all, there were seven workshop streams with multiple breakout sessions.

Two thirds of questionnaire respondents indicated that they had attended 50% or more of the workshop stream for which they completed a questionnaire. Overall attendance to the workshop streams above the 50% threshold varied between 63% (Workshop Stream VI: Building a Secure Financial Future) and 82% (Workshop Stream IV: Developing the Capacity to Manage Protected Areas) (see Exhibit 2.1). Consequently, the findings presented herein are deemed representative of the general perspectives expressed by the most active participants.

2.1 Overview of Workshop Streams

Finding 1: While workshop streams were strongly perceived as being well organized, respondents indicated that major improvements could have been made in terms of the venue location as well as in the coordination and focus of the breakout sessions.

Notwithstanding marginal differences between the workshops, all streams were strongly perceived as being well organized by attending participants (see Exhibit 2.2). Workshops V (Management Effectiveness) and VI (Building a Secure Financial Future) attained the highest rating (95% and 92% respectively) while Workshop I (Linkages in the Landscape and Seascape) obtained a rating of 82%, which suggests relatively minor differences between the workshops.

While close to three-quarters of all respondents indicated that the use of simultaneous breakout sessions to address major issues was effective (see Exhibit 2.3), comments noted in areas for improvement suggest that there is a need for better coordination and focus between the breakout sessions.

1 The extent to which, individual workshop objectives were met and how well cross-cutting themes were addressed is explored in section six of this report.
sessions in order to reduce overlap and improve the achievement of results. The majority of respondents felt that a more focused Agenda with fewer breakout sessions and/or presentations would provide more time for in-depth discussion and debate as well as promote greater participation.

Moreover, survey respondents showed mixed responses regarding the availability of pre-workshop materials. In some cases (Streams III Governance, IV Developing Capacity & V Management Effectiveness), 68% to 71% of respondents felt there were adequate materials to prepare for the workshops, but in other cases (Workshops VI Secure Financial Future and VII Building Comprehensive PA Systems), as few as 31% to 40% of respondents reached the same conclusion.

Exhibit 2.2 Organization of the Workshop Streams

Exhibit 2.3 Simultaneous Breakout Sessions

The One Major Improvement I Would Make to the Workshop I Attended Is

"Fewer presentations – more interactive debate and discussions."

"Do not step down to so many small subgroups. While all were interesting, there were too many small subgroups to be cost-effective and work effective for presenters."

"Limit the number of parallel categories and put more time for open discussions on specific points."

"Too many parallel sessions with similar topics."

"Make sub-group presentations more consistent with one another."

"Too many workshops, which overlap same issues."

"Need better facilities to conduct sessions. These facilities were barely passable. It was difficult to hear and there were frequent disturbances from adjacent sessions."

On average, more than half of respondents tended to agree that facilities were suitable for workshop activities. However, survey comments reveal that the most significant weakness of the workshop streams attended was the poor quality of the workshop rooms (too noisy, some too small, fixed chairs inappropriate, some too big) and lack of translation facilities. Similarly, improvement to the quality of the venue used to host the workshops was one of the three most important improvements suggested by participants.

The workshop streams were perceived by workshop participants as having clear objectives and thorough contents in terms of issues and topics to be covered. However, concerns were raised regarding the depth at which issues were explored and how well these issues were debated and discussed during the workshops.

Three-quarters to 90% of questionnaire respondents indicated that the workshop stream they attended provided clear objectives to guide their activities and moreover, the same proportion of respondents felt that the contents were likewise thorough and complete (see Exhibit 2.4 and Exhibit 2.5). Similarly, more than three-quarters of survey respondents indicated that the workshop materials made available in each individual stream were useful to participants.
More than three-quarters of workshop questionnaire respondents indicated that key issues and lessons learned were well articulated in their respective workshop stream (see Exhibit 2.6). Similarly, over 80% observed that the workshop stream(s) they attended adequately identified key challenges and issues (see Exhibit 2.7), 30% indicated that the level of debate was adequate (see Exhibit 2.8), and another 40% tended to agree. Concern was raised by others that issues and lessons were not sufficiently addressed (see Exhibit 2.9).

Exhibit 2.4 Workshop Objectives

Exhibit 2.5 Workshop Contents

Among the most significant strengths of the workshop streams, respondents noted that they were successful in exploring new ideas, themes and issues while strengthening technical knowledge. Workshops were also attributed with having made contributions towards the advancement of knowledge and science of Protected Areas and for having raised the profile of Protected Areas issues.

While respondents were generally positive about the thoroughness of the workshop contents, the fourth most often stated weakness and/or area for improvement noted by respondents suggests that relevant issues were addressed superficially or too broadly. Comments collected from all the workshop questionnaires indicate that there was a lack of depth to the presentations and/or that important gaps were not addressed. Respondents indicated that improvements should be considered regarding the quality of the presentations and materials provided to ensure delivery of more substantive in-depth analysis and substantive content.

Further it was recommended that workshops should limit their focus to the most important themes and issues, with fewer presentations, more debate and discussion, improved facilitation and chairing, and fewer workshops/breakout sessions.
Exhibit 2.6  Key Issues in Workshop Stream

Extent to which questionnaire respondents agree that overall, the issues were well articulated in the workshop stream

Exhibit 2.7  Workshop Effectiveness in Identifying Key Challenges and Issues

Extent to which questionnaire respondents agree that the Workshop Stream(s) they attended adequately identified key challenges and issues (n=770)

Exhibit 2.8  Level of Debate to Address Key Issues

Extent to which questionnaire respondents agree that overall, the level of debate sufficiently addressed the key issues

Exhibit 2.9  Workshop Stream Recommendations’ Effectiveness in Addressing Key Issues

Extent to which questionnaire respondents agree that the recommendations from the Workshop Stream they attended adequately addressed the key issues (n=750)

The most significant weakness noted by questionnaire respondents as well the single most important improvement they would make related to the lack of discussion and debate in the workshops. The majority of comments noted that the sessions were either inappropriately facilitated to foster the exchange of ideas or that time was poorly managed.

Lack of Debate and Discussion

“Participants should be allowed to comment and ask questions at the end of each presentations.”

“No adequate time to discuss presentations.”

“Workshops often did not allow time for rebuttal or discussion. We were often asked only for one key comment or recommendation rather than being able to discuss case studies and issues among the group.”

“Ampliar las discusiones, porque de lo contrario quedar cases obturas.” (Widen the discussions, with contrasting case studies)

“Too many presentations and too little time for discussions.”

“Time constraints for in-depth study and understanding of so many important and relevant issues.”

“Need to hear more experience from the audience to analyze issues and implications more carefully.”
Finding 2: Overall workshop streams were effectively chaired and relevant resource persons were able to constructively contribute to the debates, however some improvements were suggested.

Over three-quarters of questionnaire respondents agreed or tended to agree that workshops were either effectively chaired (see Exhibit 2.10) or that resource persons associated with each workshops (subgroup chairs, co-chairs and presenters) were able to constructively contribute to the workshop debates (see Exhibit 2.11). While the quality of presenters (competence, expertise and experience) was recognized as being one of the most significant strengths of the workshop streams, a concern was noted by participants that improvements could be made. Some respondents commented that chairs and facilitators lacked appropriate skills or abilities to manage sessions, facilitate discussions and use time efficiently.

Exhibit 2.10 Effectively Chaired Workshops

Exhibit 2.11 Resource Person Contributions

Finding 3: The workshop streams were perceived as being directly relevant to the work of respondents: the workshops were successful in enhancing the knowledge of respondents on key issues as well as in providing skills that would be useful to their organizations.

On average², over 90% of survey respondents indicated that the workshop they attended had enhanced their knowledge and understanding of the topics discussed (see Exhibit 2.12), that the stream issues were directly relevant to their work (see Exhibit 2.13) and that the knowledge and skills gained would be useful to their respective organizations (see Exhibit 2.14).

² Average based on responses from the seven workshop streams. The lowest value noted was 86% and the highest was 96%.
As noted earlier, the effectiveness of the workshops in providing new insights on relevant topics was the second most significant strength noted by respondents. Survey responses further indicate that workshops were successful in advancing the level of knowledge on the topics discussed as well as on raising the profile of issues and in setting directions. Similarly, respondents also indicated that the workshops had provided participants with relevant and practical application. Sample statements relating to these observations are noted in the textbox below.

Usefulness of Workshop Stream

“New approaches to link landscape/seascape.”

“Quality of technical details and substance.”

“Conocer muchas experiencias de paises y como solucionar sus problemas.” (Learned of many countries’ experiences and how they have solved their problems)

“Practical solutions presented.”

“Presentation of best practices and experiences from countries all over the world.”

“Various topics such as: “case studies,” “lessons learned,” “finance tools,” “management effectiveness,” “ecological integrity,” etc.”

Finding 4: The workshop streams were highly effective in providing networking opportunities to participants.

More than 89% of all questionnaire respondents indicated that the workshop they attended provided a good opportunity to network with others (see Exhibit 2.15). The richness and diversity of participants and the resulting wealth of knowledge and experience that was brought...
to bear in the workshop sessions, proved to be the most significant strength of the workshop streams according to the respondents.

The Most Significant Strength of the Workshops

“High number of experiences from all over the world presented.”

“Networking and understanding what other areas are doing.”

“Allowed me to establish contact with a strong approach useful to my organization.”

“The number of experts and parishioners who were pulled together to share experiences and forge new directions.”

“Bringing the global community to share experiences.”

“La forte mobilisation de tous les acteurs concernés par la conservation de la nature et de la biodiversité.” (All the actors concerned with the conservation of nature and biodiversity were strongly motivated)

“The opportunity to hear other experiences and listen to how people in other countries and Protected Areas are dealing with issues we work on.”

Workshop stream contributions towards the advancement of the Protected Areas Agenda as well as the Outputs of the World Parks Congress were perceived as being potentially significant.

While the extent to which workshop streams were able to make contributions to the WPC Outputs and the advancement of the Protected Areas Agenda was perceived as being potentially significant by more than two thirds of survey respondents, some wide variances were noted between the different workshops. When asked whether or not the workshop stream represents a potentially significant contribution to the Durban Accord and Action Plan, a strong majority of respondents agreed with the statement and some notably so, such as in Workshop Stream VII Building Comprehensive Protected Areas (see Exhibit 2.16). Similar results were obtained for the contributions of the workshop streams towards the Convention on Biological Diversity (see Exhibit 2.17) and the advancement of the Protected Areas Agenda (see Exhibit 2.18).
Exhibit 2.16  Contributions to the Durban Accord and Action Plan

Exhibit 2.17  Contributions to the Convention on Biological Diversity

Extent to which questionnaire respondents agree that the outputs of the workshop streams represent a potentially significant contribution to the Durban Accord and Action Plan

Extent to which questionnaire respondents agree that the outputs of the workshop streams represent a potentially significant contribution to the Convention input to the Convention on Biological Diversity
Correspondingly, the contributions made by workshop streams towards the advancement of the Protected Areas Agenda and the Outputs that resulted from the Congress were also noted by participants as one of the most significant strengths of the WPC. Respondents indicated that the workshops were successful in making contributions towards the advancement of Protected Areas knowledge and science and consequently, towards the relevant conventions and WPC Outputs.

Exhibit 2.18 Contributions to the Advancement of the Protected Areas Agenda

Extent to which questionnaire respondents agree that the recommendations from the workshop streams, if adopted and implemented, represent a significant advancement of the Protected Areas agenda

Linkages Between Workshop Streams and WPC Outputs

“The linkages to Congress key Outputs were clearly seen/acknowledged.”
“The recommendation represents a significant advancement of Protected Areas.”
“Reinforce and give new value to category V protected landscapes.”
“Acknowledgement of importance of indigenous people.”
“Bringing the TBPA experts together to set an Agenda for the next 5-10 years.”
“Content represented the scientific basis of Protected Areas design and management.”
“El consenso de los participantes sobre los principales puntos de análisis.” (Consensus among participants on the main points of the analysis)
“Programme towards setting targets for biodiversity conservation.”

Finding 5: Workshop streams were successful in meeting the expectations of participants and in providing significant added value to the World Parks Congress.

While some variances were noted between the workshop streams regarding the extent to which participants expectations were met, more than three-quarters of survey respondents were found to be in agreement with the latter statement (see Exhibit 2.19). Similarly, survey results show that 83% to 100% of workshop stream questionnaire respondents agreed that the stream they attended would provide significant added value to the World Parks Congress (see Exhibit 2.20).

Exhibit 2.19 Meeting Expectations

Exhibit 2.20 Added Value to the World Parks Congress
3. Specific Workshop Evaluation Results for Workshop Stream II

3.1 Workshop II Objectives

Finding 6: The main objectives of Workshop Stream II, Building Broader Support for Protected Areas, were perceived as having been mostly addressed.

The majority of workshop questionnaire respondents felt that the workshop stream on “Building Broader Support for Protected Areas” had been successful in addressing its main objectives. Over 45% of respondents believed that the workshop had developed guidelines and/or principles for building support for Protected Areas to a large extent while an additional 16% thought these had been completely addressed (see Exhibit 3.1). With respect to developing approaches, strategies, methodologies and/or tools for Protected Areas as well as recommendations on how Protected Areas can be integrated with other sectors of society, over 54% of respondents thought these had been largely addressed in both instances and an another 14.8% and 13.6% respectively perceived these objectives as having been completely addressed (see Exhibit 3.2 and Exhibit 3.3). Identification of lessons learned that can be used to build the required level of support was perceived by close to 47% of respondents as having been largely addressed and as having been completely addressed by more than 23% (see Exhibit 3.4). Finally, the identification of future directions and/or action plans to move forward the Agenda of building broader support for Protected Areas was largely addressed according to close to 54% of respondents while almost 20% felt that this objective had been completely addressed (see Exhibit 3.5).

Exhibit 3.1 Guidelines and/or Principles for Building Support

Exhibit 3.2 Approaches, Strategies, Methodologies and/or Tools for Building Support

Exhibit 3.3 Recommendations on Integrating Protected Areas in Other Sector of Society

Exhibit 3.4 Lessons Learned for Building Support
Finding 7: Useful applications of tourism for the protection of Marine Protected Areas were not considered to have been well addressed within Workshop Stream II on Building Broader Support for Protected Areas.

While more than 52% of questionnaire respondents felt that the Marine cross-cutting theme was not pertinent to the sessions they attended, fewer than 14% of respondents thought that useful applications of tourism for the protection of Marine Protected Areas were largely or thoroughly addressed.

Finding 8: Participants were divided regarding the extent to which relevant World Heritage issues were adequately addressed during workshop stream on Building Support.

Approximately the same number of questionnaire respondents indicated that the use of the World Heritage Convention as a mechanism to build broader support for Protected Areas had been largely to thoroughly addressed (29%) as compared to those that indicated that this was not or was only somewhat addressed in the sessions they attended (33.9%). Similarly, more than 29% of respondents indicated that the need for broader support for World Heritage Sites in situations of conflict was largely to thoroughly addressed, while close to 28% of respondents believed that this had either not or only partially been addressed (see Exhibit 3.6 and Exhibit 3.7).
Finding 9: The majority of issues related to the cross cutting theme of Communities and Equity in the workshop stream on Building Support were perceived by questionnaire respondents as having been adequately addressed.

Poverty and sustainable livelihoods were perceived as having been largely addressed (33%) to thoroughly addressed (16.7%) by half of the questionnaire respondents. Fewer than 32% felt these issues were either not addressed (3.5%) or only somewhat so (see Exhibit 3.8). Similar results were obtained regarding the extent to which non-material values and benefits of Protected Areas to communities and societies were addressed (see Exhibit 3.9). Relatively equal numbers of respondents believed that the role of indigenous peoples in ecotourism as well as community-based ecotourism were adequately addressed, as were those that suggested these issues were only partially addressed (see Exhibit 3.10 and Exhibit 3.11). Lastly, more than 45% of respondents felt that the recognition of the need for urban population support for Protected Areas was largely to thoroughly addressed while those who thought this issue was not addressed (6%) or only somewhat addressed (21%) totalled 27% (see Exhibit 3.12).
3.3 Profile of Workshop Stream II Participants

The following section presents information relative to the description of the workshop participants. Exhibit 3.13 and 3.14 provides the sex ratio and affiliation of workshop participants; Exhibits 3.15 and 3.16 describe the respective professional qualifications of the participants and the region in which they work; Exhibit 3.17 details the approximate level of attendance and Exhibit 3.18 provides an overview of what participants attended.

4. Short Course Results

The following section presents the results of the short course evaluation on Strategic Participatory Communications followed by comments that were noted by participants.

4.1 Strategic Participatory Communications

Participant Comments (Strategic Participatory Communication)

“No food during lunch time!”

“Met my expectations.”

“It can be better if a course of this nature would be advertised and be attended by all interested parties on regular basis.”

“I suggest the Commission to continue to support this group.”

“Too much at a time is difficult to grasp. More time in 1st days session.”

“I can be happy if Park-wardens and Park Managers can also attend this course - and please organise lunch parks.”

“No food during lunch time. Please try to organise some.”

“This course needs to be given a longer time frame, because it is very useful and interesting on the long term.”

“If all the instructors could let us come up with answers and not want to do them for us, but everything was very exciting. I enjoyed it.”

“I will be good to have follow-up workshops.”
