4.3. *Pre-Qualification Criteria*

IUCN will use the following Pre-Qualification Criteria to determine whether you have the capacity to provide the required goods and/or services to IUCN. Please provide the necessary information in a single, separate document.

Pre-Qualification Criteria	
1	3 relevant references of clients similar to IUCN / similar work
2	Confirm that you have all the necessary legal registrations to perform the work

7	Quality Standards and Quality Assurance

4.4. *Technical Proposal*

The technical proposal must address each of the criteria stated below explicitly and separately, quoting the relevant criteria reference number (left-hand column).

Proposals in any other format will significantly increase the time it takes to evaluate, and such Proposals may therefore be rejected at IUCN's discretion.

Where CVs are requested, these must be of the individuals who will actually carry out the work specified. The individuals you put forward may only be substituted with IUCN's approval.

IUCN will evaluate technical proposals with regards to each of the following criteria and their relative importance:

	Description	Information to provide	Relative weight
1	Methodology, approach and workplan	A detailed description of the methodological approach, means that will be used to implement the work, and participants to be engaged	30%
2	Specific experience relevant to drylands and sustainable land management	CVs of lead expert outlining relevant experience	20%

3	Broad expertise on drylands management challenges and opportunities, global and regional strategies, and policies	CV and recommendation from previous work experience	15%
4	A good understanding of OECMs and community-based conservation	Individual CV or company profile outlining relevant knowledge and experience	25%
5	Experience and knowledge of ecological restoration science and practice	Individual CV or company profile outlining relevant knowledge and experience	10%
TOTAL			100%

4.5. *Financial Proposal*

4.5.1. The financial proposal must be a fixed and firm price for the provision of the goods/services stated in the RfP in their entirety.

For information only, the price should be broken down as follows:

Rates and Prices

Staff Input Budget

Expert Description	Day/Week Rate	Total Input	Days/Weeks	Sub-Total Fee
Team Leader				
Expert 1				
Expert 2				
TOTAL		n/a		

Expenses Budget

Expense Description	Unit Rate	Quantity	Sub-Total
International travel 1			
International travel 2			
Domestic travel 1			
Domestic travel 2			
Daily Subsistence			
Other 1			
Other 2			
Other 3			
TOTAL		n/a	

4.5.2. *Prices include all costs*

Submitted rates and prices are deemed to include all costs, insurances, taxes (except VAT, see below), fees, expenses, liabilities, obligations, risk and other things necessary for the performance of the Terms of Reference or Specification of Requirements. IUCN will not accept charges beyond those clearly stated in the Financial Proposal. This includes applicable withholding taxes and similar. It is your responsibility to determine whether such taxes apply to your organisation and to include them in your financial offer.

4.5.3. *Applicable Goods and Services Taxes*

Proposal rates and prices shall be exclusive of Value Added Tax.

4.5.4. *Currency of proposed rates and prices*

All rates and prices submitted by Proposers shall be in United States Dollar (USD)

4.6. Additional information not requested by IUCN should not be included in your Proposal and will not be taken into account in the evaluation.

4.7. Your proposal must remain valid and capable of acceptance by IUCN for a period of 90 calendar days following the submission deadline.

You may freely withdraw or change your proposal at any time prior to the submission deadline by written notice to the IUCN Contact. However, in order to reduce the risk of fraud, no changes or withdrawals will be accepted after the submission deadline.

5. EVALUATION OF PROPOSALS

5.1. *Completeness*

IUCN will firstly check your proposal for completeness. Incomplete proposals will not be considered further.

5.2. *Pre-Qualification Criteria*

Only proposals that meet all of the pre-qualification criteria will be evaluated.

5.3. *Technical Evaluation*

5.3.1. *Scoring Method*

Your proposal will be assigned a score from 0 to 10 for each of the technical evaluation criteria, such that '0' is low and '10' is high.

5.3.2. *Minimum Quality Thresholds*

Proposals that receive a score of '0' for any of the criteria will not be considered further.

5.3.3. *Technical Score*

Your score for each technical evaluation criterion will be multiplied with the respective relative weight (see Section 4.4) and these weighted scores added together to give your proposal's overall technical score.

5.4. *Financial Evaluation and Financial Scores*

The financial evaluation will be based upon the full total price you submit. Your financial proposal will receive a score calculated by dividing the lowest financial proposal that has passed the minimum quality thresholds (see Section 5.3.2) by the total price of your financial proposal.

Thus, for example, if your financial proposal is for a total of CHF 100 and the lowest financial proposal is CHF 80, you will receive a financial score of $80/100 = 80\%$

5.5. *Total Score*

Your proposal's total score will be calculated as the weighted sum of your technical score and your financial score.

The relative weights will be:

Technical:	70%
Financial:	30%

Thus, for example, if your technical score is 83% and your financial score is 77%, you will receive a total score of $83 * 70\% + 77 * 30\% = 58.1\% + 23.1\% = 81.2\%$.

Subject to the requirements in Sections 4 and 7, IUCN will award the contract to the bidder whose proposal achieves the highest total score.

6. EXPLANATION OF PROCUREMENT PROCEDURE

- 6.1. IUCN is using the Open Procedure for this procurement. This means that the contracting opportunity is published on IUCN's website and open to all interested parties to take part, subject to the conditions in Section 7 below.
- 6.2. You are welcome to ask questions or seek clarification regarding this procurement. Please email the IUCN Contact (see Section 2), taking note of the deadline for submission of questions in Section 3.1.
- 6.3. All proposals must be received by the submission deadline in Section 3.2 above. Late proposals will not be considered. All proposals received by the submission deadline will be evaluated by a team of three or more evaluators in accordance with the evaluation criteria stated in this RfP. No other criteria will be used to evaluate proposals. The contract will be awarded to the bidder whose proposal received the highest Total Score. IUCN does, however, reserve the right to cancel the procurement and not award a contract at all.
- 6.4. IUCN will contact the bidder with the highest-scoring proposal to finalise the contract. We will contact unsuccessful bidders after the contract has been awarded and provide detailed feedback. The timetable in Section 3.1 gives an estimate of when we expect to have completed the contract award, but this date may change depending on how long the evaluation of proposals takes.

11. ABOUT IUCN

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Headquartered in Switzerland, IUCN Secretariat comprises around 1,000 staff with offices in more than 50 countries.

Created in 1948, IUCN is now the world's largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,300 Member organisations and some 10,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people's well-being.

Background and justification

Drylands cover 41% of the Earth's land surface and are found on all continents. Dryland ecosystems include savannahs, woodlands, grasslands, semi-desert, and desert, and include 1/3 of the world's biodiversity hotspots. Most of dryland ecosystems are grasslands, and rangelands. Drylands are home to approximately 2 billion people, and are characterized by rapid population growth, and above average levels of poverty. There are 500 million of pastoralists in drylands. Livestock keepers, including pastoralists, occupy the majority of drylands (approx. 84%). Crop farming is the second most widely practiced livelihood in drylands (Davies et al., 2016)¹.

Dryland ecosystems experience high levels of degradation. Factors that contribute to dryland degradation include: land conversion (to cropland), over-exploitation, changing fire regimes, introduction of non-native plants, over-exploitation of water, overharvesting of wild species and long-term impacts of climate change. The sustainable management of drylands will help address biodiversity conservation, food security, economic development, livelihoods and human wellbeing.

Grasslands are the dominant land cover in drylands. Some key facts and opportunities about grasslands include:

- Most of grasslands and other production landscapes, e.g. farmlands, are found in dryland areas
- A vast majority of grasslands are agricultural lands
- Grasslands cover more than half of land on earth
- Grasslands support essential ecosystem services including climate regulation and biodiversity conservation

Because of their unique values, grasslands have the potential to contribute to conservation, through Other Effective area-based Conservation Measures (OECMs). OECMs is defined by the CBD as 'a geographically defined area other than a protected area, which is governed and managed in ways that achieve positive and sustained long-term outcomes for the *in-situ* conservation of biodiversity, with associated ecosystem functions and services and where applicable, cultural, spiritual, socio-economic, and other locally relevant values.'

The present terms of reference seek to obtain the services of a consultant to conduct an assessment and analysis of OECMs initiatives in drylands, and their potential for biodiversity conservation.

This work is conducted as part of the global coordination project (GCP) of the [GEF-7 flagship Dryland Sustainable Landscapes \(DSL\) Impact Program](#), which comprises the GCP and 11 country child projects². The DSL-IP is led by FAO and co-executed with FAO, IUCN, and WOCAT. The IP objective is to *avoid, reduce, and reverse further degradation, desertification, and deforestation of land and ecosystems in drylands, through the sustainable management of production landscapes*. The GCP objective is to maximize the effectiveness, efficiency and sustainability of GEF-7 investments in sustainable drylands management to achieve Land Degradation Neutrality.

This work will contribute to achieve this overall objective as it will increase incentives to protect and conserve drylands. If effectively managed, these areas can deliver biodiversity conservation outcomes; they can also deliver on international targets and commitments such as the Land degradation neutrality, and the 3 Rio conventions, including the 30x30 target.

Objective

The global objective is to raise awareness and trigger further reflection about considering productive lands found in drylands as Other Effective area-based Conservation Measures, and prioritization in interventions.

Specific tasks

- Conduct a desktop review of OECM initiatives in dryland areas in support of biodiversity conservation.

¹ Davies, J., Barchiesi, S., Ogali, C.J., Welling, R., Dalton, J., and P. Laban (2016). Water in drylands: Adapting to scarcity through integrated management. Gland, Switzerland: IUCN. 44pp

² Angola, Botswana, Burkina Faso, Kazakhstan, Kenya, Malawi, Mongolia, Mozambique, Namibia, Tanzania, Zimbabwe

- Review and analyse the potential of these areas, including pastoral lands as effective conservation measures.
- Identify and document case studies of biodiversity conservation in productive lands for East Africa, West Africa, and Central Asia. Target landscapes include grasslands and savannahs of East and West Africa, and the temperate grasslands and steppes and dry forests of Central Asia.
- Formulate recommendations for developing and implementing OECMs in drylands.

Expected results

- OECMs initiatives in dryland areas in support of biodiversity conservation are documented, analysed, and mapped.
- The potential of pastoral lands as effective conservation measures is analysed
- OECMs case studies for East Africa, West Africa, and Central Asia
- Recommendations for implementing OECM in drylands

It is expected that this study will help better understand the unique features of drylands and grasslands, how they can be maintained, restored and contribute to biodiversity conservation.

The results of this study will inform the regional DSL IP databases, and will support countries to prioritize interventions of transboundary scale in the targeted regions.

The study is further expected to:

- Advance the conversation around the recognition of traditional land management and governance by pastoralists in nature conservation, and securing land tenure and land rights;
- Lead to a better understanding of the use of livestock by pastoralists as a way to restore lands, and the implementation of an effective grazing management policy
- Enhance the connection between the different sectors involved in drylands management to restore and protect biodiversity, i.e. agriculture, livestock production and conservation
- Improve on land tenure and land governance related policies formulation and implementation

Deliverables

- Inception report that provides an interpretation of the assignment, outline the methodology and resources for conducting the study, and outline of the final report.
- Draft report addressing all elements outlined above.
- Final report incorporating feedback from IUCN.

Time schedule

The assignment is expected to be completed within a maximum of 35 workdays during September-December 2022 as follows:

- Conduct an overview of OECM initiatives in pastoral lands of dryland areas in support of biodiversity conservation - 8 days
- Review and analyze the potential of these pastoral lands as effective conservation measures - 8 days
- Provide case studies for East Africa, West Africa, and Central Asia - 10 days
- Draft a report based on the analysis and case studies - 6 days
- Formulate recommendations for developing and implementing OECM in dryland areas - 1 day
- Final report (after integration of comments received) - 2 days

The consultant will provide in his/her offer a detailed work plan in the inception report.

Profile of the consultant

The work will be conducted by an international consultant with the following qualification and experience:

- Postgraduate qualification in natural resources management, Environmental Science, Biodiversity/protected areas management or related field, with a focus on drylands
- Experience and Knowledge of ecological restoration science and practice
- Proven experience in sustainable land management and dryland management
- A good understanding of OECMs and community-based conservation
- Experience in GIS would be an asset
- Strong analytical skills, including capacity to synthesise academic literature
- Proven skills in drafting high quality reports

- Experience in the target regions and familiarity with the key stakeholders is a strong asset
- Fluency in English
