2022 Report of the IUCN Species Survival Commission and Secretariat

The IUCN Species Survival Commission (SSC)

The IUCN Species Survival Commission (SSC) is a science-based network of thousands of volunteer experts from almost every country of the world, all working together toward achieving the vision of “a just world that values and conserves nature through positive action to both prevent the loss and aid recovery of the diversity of life on earth.”

Members of SSC belong to one or more of near 200 Specialist Groups, Red List Authorities, Action Partnerships, Task Forces, and Conservation Committees that make up the Network, each focusing on a taxonomic group (plants, fungi, mammals, birds, reptiles, amphibians, fishes, and invertebrates), national species, or a disciplinary issue, such as sustainable use and livelihoods, translocation of species, wildlife health, climate change, and conservation planning.

Framed by the Species Conservation Cycle, SSC’s major role is to provide information to IUCN on biodiversity conservation, the inherent value of species, their role in ecosystem health and functioning, the provision of ecosystem services, and their support to human livelihoods. This information is fed into the IUCN Red List of Threatened Species.

2021-2025 Species Strategic Plan

The IUCN Species Strategic Plan encompasses the joint work of the IUCN Species Survival Commission and a number of partnerships to achieve more than 2,700 targets proposed by the Network during the 2021-2025 quadrennium.

To accomplish those targets, the Species Conservation Cycle was established, which is the conceptual framework for the Network activities. The Species Conservation Cycle’s main purpose is to guide efforts for valuing and conserving biodiversity through three essential components that are linked to each other:

ASSESS: Understand and inform the world about the status and trends of biodiversity.

PLAN: Develop collaborative, inclusive and science-based conservation strategies, plans and policies.

ACT: Convene and mobilise conservation actions to improve the status of biodiversity.

Their implementation requires two transversal components:

NETWORK: Enhance and support our immediate network and alliances to achieve our biodiversity targets.

COMMUNICATE: Drive strategic and targeted communications to enhance our conservation impact.

SSC Species Report

Annual progress in the implementation of the 2021-2025 Species Strategic Plan is documented in the SSC *Species Report*, which consists of a comprehensive description and analysis of the activities and results generated by the members of the SSC Network each year. Each SSC Group contributes to this document by providing a yearly summarised description of their achievements, which is presented in stand-alone reports.

Structure of the IUCN SSC Stand-alone Report

Stand-alone reports summarize the activities conducted and results generated by each group member of the SSC. Following, is the structure of the stand-alone report and the contents under each session.

Title of the SSC Group

Photograph(s) of the Chair / Co-Chairs

Group information

Includes names of Chair / Co-Chairs, Vice-Chairs, Deputy Chairs, Red List Authority Coordinators and Program Officers, their institutional affiliations, number of members and social networks currently active.

Logo of the SSC Group

Mission statement

Includes the mission of the group.

Projected impact for the 2021-2025 quadrennium

Includes the description of the impact on species conservation resulting from the implementation of the targets formulated by the group for the 2021-2025 quadrennium.

Targets for the 2021-2025 quadrennium

Includes the targets planned by the SSC Group for the 2021-2025 quadrennium ordered alphabetically by component of the Species Conservation Cycle. Each target is labeled with a numerical code (e.g., T-001, T-012) that identifies it in the SSC DATA database and its status for the reported year is indicated (Not initiated, On track or Achieved).

Activities and results

Includes the targets for which activities were conducted and results were generated during the reported year, ordered alphabetically, first by component of the Species Conservation Cycle, and second by Activity Category. Description of activities and results includes the indicator that best describes progress, its associated quantitative or qualitative result, and the narrative description of the activity conducted or result obtained. Each activity or result reported is linked to the Key Species Result to which it is mainly associated (e.g., KSR#1, KSR#5).

Acknowledgements

Includes the acknowledgements to funding agencies, partners, and persons who contributed to the progress of the targets of the group.

Summary of achievements

Summarises information of the group's strategic plan for the quadrennium and progress achieved implementing targets for all the components of the Species Conservation Cycle during the reported year.

Mission statement

The mission of the Mushroom, Bracket and Puffball Specialist Group is to advance fungal conservation by raising awareness of the importance of fungi and the need to conserve them, building capacity among the mycological community, and greatly increasing the number of fungi on national and the global Red Lists.

Projected impact 2021–2025

Fewer than 2% of described Mushrooms, Bracket and Puffball fungi have had their conservation status assessed at the start of the quadrennium. Completing and publishing Red List assessments is a key activity of the Specialist Group to identify species in need of conservation action. Completing assessments is not the only activity of the Specialist Group, as efforts across the full Conservation Cycle will be undertaken to ensure that action to raise the profile of fungi have fungi included in policies and action plans, and efforts to mitigate the decline of endangered species are being undertaken.

Targets 2021–2025

ASSESS

T-001 Produce and submit 1,600 global assessments for the IUCN Red List.
Status: On track

T-002 Produce global, comprehensive assessments of genus *Cantharellus*.
Status: On track

COMMUNICATE

T-003 Raise awareness on the importance of fungi and their conservation among young people, and engaging students into pursuing a career in Mycology.
Status: On track

Activities and results 2022

ASSESS Red List

T-001 Produce and submit 1,600 global assessments for the IUCN Red List. (KSR 6)
Number of new global Red List assessments completed: 160

Result description: Two Latin American red listing workshops plus work supported by SSC Edge Grant and completion of pre-assessments from prior workshops resulted in the completion of 160 new global Red List assessments done in 2022.

T-002 Produce global, comprehensive assessments of genus *Cantharellus*. (KSR 6)

Number of new global Red List assessments completed: 55

Result description: Work continues on publishing a comprehensive assessment of *Cantharellus* and *Craterellus* species. In 2022, 22 new assessments were published for a total of 55 published species. Another nearly 300 species awaiting finalisation and review.

COMMUNICATE Communication

T-003 Raise awareness on the importance of fungi and their conservation among young people, engaging students into pursuing a career in Mycology. (KSR 13)

Number of digital communication outputs developed: 50

Result description: Information on fungi, stories about specific amazing fungi, and updates on red listing and other fungal conservation actions were highlighted on social media posted by the FunCC, Global Center for Species, Survival, and Specialist Group members.

Number of SSC members' presentations developed: 53

Result description: Mushroom, Bracket, and Puffball Specialist Group members are active participants and presenters at conferences, workshops, and public events. Presentation topics included updates on biodiversity surveys, ecology, taxonomic treatments, conservation initiatives as well as general talks to the public, highlighting the importance of fungi and the need to conserve them.

Summary of achievements

Total number of targets 2021–2025: 3

Geographic regions: 3 Global

Actions during 2022:

Assess: 2 (KSR 6)

Communicate: 2 (KSR 13)

Overall achievement 2021–2025:

Acknowledgements

The Mushroom Bracket and Puffball Specialist Group acknowledge the collaboration and support of the Mohamed Bin Zayed Species Conservation Fund, IUCN Red List Unit, Global Center for Species Survival, IUCN SSC Chair's office, On the EDGE.
