4. COMPLETING AND SUBMITTING A PROPOSAL

4.1. Your Proposal must consist of the following three documents:
   - Signed Declaration of Undertaking (see Attachment 2)
   - Technical Proposal (see Section 4.4 below)
   - Financial Proposal (see Section 4.5 below)

Please DO NOT email the password before the deadline for Proposal submission.

4.3. Technical Proposal

The technical proposal must address each of the criteria stated below explicitly and separately, quoting the relevant criteria reference number (left-hand column).

Proposals in any other format will significantly increase the time it takes to evaluate, and such Proposals may therefore be rejected at IUCN's discretion.

Where CVs are requested, these must be of the individuals who will actually carry out the work specified. The individuals you put forward may only be substituted with IUCN's approval.

IUCN will evaluate technical proposals with regards to each of the following criteria and their relative importance:

4.4. **Financial Proposal**

4.4.1. The financial proposal must be a fixed and firm price for the provision of the goods/services stated in the RfP in their entirety.

4.4.2. **Prices include all costs**

Submitted rates and prices are deemed to include all costs, insurances, taxes (except VAT, see below), fees, expenses, liabilities, obligations, risk and other things necessary for the performance of the Terms of Reference or Specification of Requirements. IUCN will not accept charges beyond those clearly stated in the Financial Proposal. This includes applicable withholding taxes and similar. It is your responsibility to determine whether such taxes apply to your organisation and to include them in your financial offer.

4.4.3. **Applicable Goods and Services Taxes**

Proposal rates and prices shall be exclusive of Value Added Tax.

4.4.4. **Currency of proposed rates and prices**

All rates and prices submitted by Proposers shall be in Euros

4.4.5. **Breakdown of rates and prices**

For information only, the price needs to be broken down as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Quantity</th>
<th>Unit Price</th>
<th>Total Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>Daily rate</td>
<td>15 days</td>
<td>500</td>

</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td></td>
<td></td>
<td><strong>7,500,00</strong></td>
</tr>
</tbody>
</table>

4.5. Additional information not requested by IUCN should not be included in your Proposal and will not be taken into account in the evaluation.

4.6. Your proposal must remain valid and capable of acceptance by IUCN for a period of 90 calendar days following the submission deadline.

4.7. **Withdrawals and Changes**

You may freely withdraw or change your proposal at any time prior to the submission deadline by written notice to the IUCN Contact. However, in order to reduce the risk of fraud, no changes or withdrawals will be accepted after the submission deadline.

5. **EVALUATION OF PROPOSALS**

5.1. **Completeness**

IUCN will firstly check your proposal for completeness. Incomplete proposals will not be considered further.

5.2. **Technical Evaluation**

5.2.1. **Scoring Method**

Your proposal will be assigned a score from 0 to 10 for each of the technical evaluation criteria, such that ‘0’ is low and ‘10’ is high.

5.2.2. **Minimum Quality Thresholds**

Proposals that receive a score of ‘0’ for any of the criteria will not be considered further.

5.2.3. **Technical Score**
Your score for each technical evaluation criterion will be multiplied with the respective relative weight (see Section 4.4) and these weighted scores added together to give your proposal’s overall technical score.

5.3. **Financial Evaluation and Financial Scores**

The financial evaluation will be based upon the full total price you submit. Your financial proposal will receive a score calculated by dividing the lowest financial proposal that has passed the minimum quality thresholds (see Section 5.2.2) by the total price of your financial proposal.

Thus, for example, if your financial proposal is for a total of CHF 100 and the lowest financial proposal is CHF 80, you will receive a financial score of 80/100 = 80%

5.4. **Total Score**

Your proposal’s total score will be calculated as the weighted sum of your technical score and your financial score.

The relative weights will be:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Technical</td>
<td>70%</td>
</tr>
<tr>
<td>Financial</td>
<td>30%</td>
</tr>
</tbody>
</table>

Thus, for example, if your technical score is 83% and your financial score is 77%, you will receive a total score of 83 * 70% + 77 * 30% = 58.1% + 23.1% = 81.2%.

Subject to the requirements in Sections 4 and 7, IUCN will award the contract to the bidder whose proposal achieves the highest total score.

6. **EXPLANATION OF PROCUREMENT PROCEDURE**

6.1. IUCN is using the Invitation Procedure for this procurement. This means that only invited bidders may submit a proposal. IUCN typically invites from four to six bidders to submit a proposal.

6.2. You are welcome to ask questions or seek clarification regarding this procurement. Please email the IUCN Contact (see Section 2), taking note of the deadline for submission of questions in Section 3.1.

6.3. All proposals must be received by the submission deadline in Section 3.1 above. Late proposals will not be considered. All proposals received by the submission deadline will be evaluated by a team of two or more evaluators in accordance with the evaluation criteria stated in this RfP. No other criteria will be used to evaluate proposals. The contract will be awarded to the bidder whose proposal received the highest Total Score. IUCN does, however, reserve the right to cancel the procurement and not award a contract at all.

6.4. IUCN will contact the bidder with the highest-scoring proposal to finalise the contract. We will contact unsuccessful bidders after the contract has been awarded and provide detailed feedback. The timetable in Section 3.1 gives an estimate of when we expect to have completed the contract award, but this date may change depending on how long the evaluation of proposals takes.

7. **CONDITIONS FOR PARTICIPATION IN THIS PROCUREMENT**

7.1. To participate in this procurement, you are required to submit a proposal, which fully complies with the instructions in this RfP and the Attachments.

7.1.1. It is your responsibility to ensure that you have submitted a complete and fully compliant proposal.
7.1.2. Any incomplete or incorrectly completed proposal submission may be deemed non-compliant, and as a result you may be unable to proceed further in the procurement process.

7.1.3. IUCN will query any obvious clerical errors in your proposal and may, at IUCN's sole discretion, allow you to correct these, but only if doing so could not be perceived as giving you an unfair advantage.

In case of joint venture, one company shall not be allowed to participate in two different joint ventures in the same procurement nor shall a company be allowed to submit a proposal both on its behalf and as part of a joint venture for the same procurement. A bidder who submits or participates in more than one proposal (other than as a subcontractor or in cases of alternatives that have been permitted or requested) shall cause all the proposals with the bidder’s participation to be disqualified.

7.6. By taking part in this procurement, you accept the conditions set out in this RfP, including the following:

- It is unacceptable to give or offer any gift or consideration to an employee or other representative of IUCN as a reward or inducement in relation to the awarding of a contract. Such action will give IUCN the right to exclude you from this and any future procurements, and to terminate any contract that may have been signed with you.
- Any attempt to obtain information from an employee or other representative of IUCN concerning another bidder will result in disqualification.
- Any price fixing or collusion with other bidders in relation to this procurement shall give IUCN the right to exclude you and any other involved bidder(s) from this and any future procurements and may constitute a criminal offence.

8. CONFIDENTIALITY AND DATA PROTECTION

8.1. IUCN follows the European Union’s General Data Protection Regulation (GDPR). The information you submit to IUCN as part of this procurement will be treated as confidential and shared only as required to evaluate your proposal in line with the procedure explained in this RfP, and for the maintenance of a clear audit trail. For audit purposes, IUCN is required to retain your proposal in its entirety for 10 years after the end of the resulting contract and make this available to internal and external auditors and donors as and when requested.
8.2. In the Declaration of Undertaking (Attachment 2) you need to give IUCN express permission to use the information you submit in this way, including personal data that forms part of your proposal. Where you include personal data of your employees (e.g. CVs) in your proposal, you need to have written permission from those individuals to share this information with IUCN, and for IUCN to use this information as indicated in 8.1. Without these permissions, IUCN will not be able to consider your proposal.

If you have a complaint or concern regarding the propriety of how a competitive process is or has been executed, then please contact procurement@iucn.org. Such complaints or concerns will be treated as confidential and are not considered in breach of the above restrictions on communication (Section 2.1).

10. CONTRACT

The contract will be based on IUCN’s template in Attachment 3, the terms of which are not negotiable. They may, however, be amended by IUCN to reflect particular requirements from the donor funding this particular procurement.

11. ABOUT IUCN

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Headquartered in Switzerland, IUCN Secretariat comprises around 1,000 staff with offices in more than 50 countries.

Created in 1948, IUCN is now the world’s largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,300 Member organisations and some 10,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people’s well-being.

Title: Analysis of the potential contribution of grasslands to the goals of the Kunming Montreal Global Biodiversity Framework (GBF)

Objective of the Consultancy

This consultancy has the following objective(s):

A. Analyze the potential and linked contribution of grasslands to the 23 targets of the Kunming Montreal Global Biodiversity Framework (GBF)\(^1\), including but not limited to related themes of biodiversity conservation, ecosystem restoration, livelihoods and food production and support, indigenous people groups.

B. Develop messages based on priority actions that need to be taken to sustainably manage and restore grasslands, that can be adopted by the GBF, and used by convention parties, including policymakers and negotiators, convention focal points, governments among others in negotiations processes and integrated into policy decision including NBSAPS, that allows for the integration of grassland and rangeland restoration.

C. Develop case studies that build on the messages from (B) above, that also build a business case for restoration of grasslands globally, and the contribution to the global sustainability goals.

About the Project

Grassland is a global biome classified based on its distinct evolutionary and ecological construct and consisting of grasses primarily, but also coexist with trees, shrubs, bushes in woodlands, drylands, savannas, steppes, etc. Rangelands describe their uses, largely for grazing of domestic and wild ungulates for economic, cultural and livelihood purposes. The two terms are often used interchangeably in development literature to describe the same socio-ecological systems. Grasslands and rangelands together occupy 70% of the global agricultural area and are relied on extensively for producing the world’s food, forage, and fiber.

2 billion people live in grasslands and depend on grasslands for food, water, and socio-cultural identity. 49% of global grasslands are already degraded or undergoing degradation. This is driven broadly by unsustainable land-uses, land-use changes, and land fragmentation.

Historical and ongoing changes in national and regional grassland policies are also triggering the adoption of short-term economic gains from these ecosystems, for example from agricultural expansion, for the long-term integrity of grassland ecosystem. Poor management that is linked to overgrazing is resulting in soil erosion, loss of wildlife and biodiversity, and encroachment of invasive alien species – leading to ecological and economic loss of land productivity and desertification. The way of life that integrates building resilience on the landscape level, both for ecosystems and people, is being impeded by policies at multiple levels. Climate change impacts cyclically exacerbate the degradation of grasslands.

The Kunming Montreal Global Biodiversity Framework (GBF) and Grasslands

The Global Biodiversity Framework (GBF) plays a crucial role in achieving land restoration goals, including grassland restoration. This includes providing a comprehensive framework for integrating biodiversity conservation and land restoration efforts, including grassland restoration.

As a policy framework, the GBF provides a global framework that aligns biodiversity conservation efforts with broader sustainability goals. Integrating biodiversity considerations into land restoration initiatives, the GBF ensures that restoration activities not only contribute to the recovery of ecosystems but also support the conservation of biodiversity and the sustainable use of natural resources.

The GBF recognises the interconnectedness of biodiversity, ecosystems, and human well-being. Adopting a holistic approach to land restoration that considers ecological, social, and economic dimensions is essential for addressing the underlying drivers of land degradation and promoting sustainable land management practices that enhance ecosystem resilience and support the livelihoods of local communities.
The GBF emphasizes the importance of partnerships and collaboration among governments, civil society, indigenous peoples, local communities, and the private sector to promote synergies between biodiversity conservation, land restoration, and sustainable development agendas, maximizing the impact of collective action and leveraging resources more effectively.

Knowledge sharing, capacity development, and technology transfer are equally important for countries to build the necessary skills and expertise to implement successful grassland restoration projects and overcome barriers to implementation.

By aligning policies, setting ambitious targets, building capacity, and fostering collaboration, the GBF contributes to the achievement of land restoration goals and promotes the sustainable management of ecosystems for the benefit of present and future generations.

**Description of the Assignment**

Despite the role that grasslands and rangeland play, they are largely overlooked in the global sustainability agenda. The Global Ecosystem Restoration agenda does not adequately identify, address, or adequately integrate the value of grasslands and rangelands in the discourse, and therefore leaving grasslands at the risk of further degradation through inappropriate tree-based interventions. Enhancing the inclusion of grasslands in the global sustainability agenda requires a deeper comprehension of societal perspectives on these ecosystems and why they often receive insufficient attention. It also calls for the development of novel approaches to assess their restoration significance and their role in advancing ecological knowledge and global goals for ecosystem and land restoration.

The purpose of this consultancy is to analyse the potential and role of grasslands in achieving the GBF and global sustainability goals, the inherent challenges of recognition and inclusion in the global agenda and possible entry points for developing a stronger stance for grasslands.
