Assessments of Nature-Based Solutions within NDCs:

Where we are and what next?

Friday, 10 November 2017, 16:30-18:00
IUCN Pavilion, UNFCCC COP23, Bonn Zone

Several assessments have been undertaken on the extent to which countries have integrated nature-based solutions (NBS) within their Nationally Determined Contributions (NDCs), often with different scopes and methodologies. This event will present some of these key assessments with the aim of exploring a future consolidation to help inform the 2018 Facilitative Dialogue, and provide common guidance to Parties on how to incorporate enhanced NBS-based measures in their next round of NDCs.

Panellists:

Sandeep Sengupta, Global Coordinator, IUCN Climate Change Portfolio (Moderator)

Aleksandar Rankovic, Research Fellow, Institute for Sustainable Development and International Relations (IDDRI)

Nathalie Seddon, Professor, University of Oxford, and Research Associate, International Institute for Environment and Development (IIED), London

Alan Kroeger, Land Use Consultant, Climate Focus

Dorothee Herr, Manager, Oceans and Climate Change, IUCN

Pilar Jacobo, Deputy Director, International & Regional Affairs, CONANP, Ministry of Environment and Natural Resources (SEMARNAT), Government of Mexico
