

A Critical Decade for Environmental Law

2ND WORLD ENVIRONMENTAL LAW CONGRESS

Measuring the effectiveness of environmental law through legal indicators

Thursday 16 December –
Friday 17 December 2021

PARIS, FRANCE

Online (Zoom)

[Register Here](#)

Legal regimes are critical to address environmental threats from pollution, biodiversity loss, and the climate crisis. Environmental laws are only useful, however, if they are effectively applied. Legal indicators provide a mechanism to evaluate the impact of laws on the natural environment.

On the first day of this event, speakers will present legal indicators and explore their effectiveness in international, European, and national environmental law. On the second day, speakers will evaluate the effectiveness of international conventions and sustainable development goals through these legal indicators.

SPEAKERS

CHRISTINA VOIGT

Chair of the IUCN World Commission on Environmental Law, International Union for Conservation of Nature, Professor of Law, University of Oslo, Norway
