Marine Journey

Event Guide

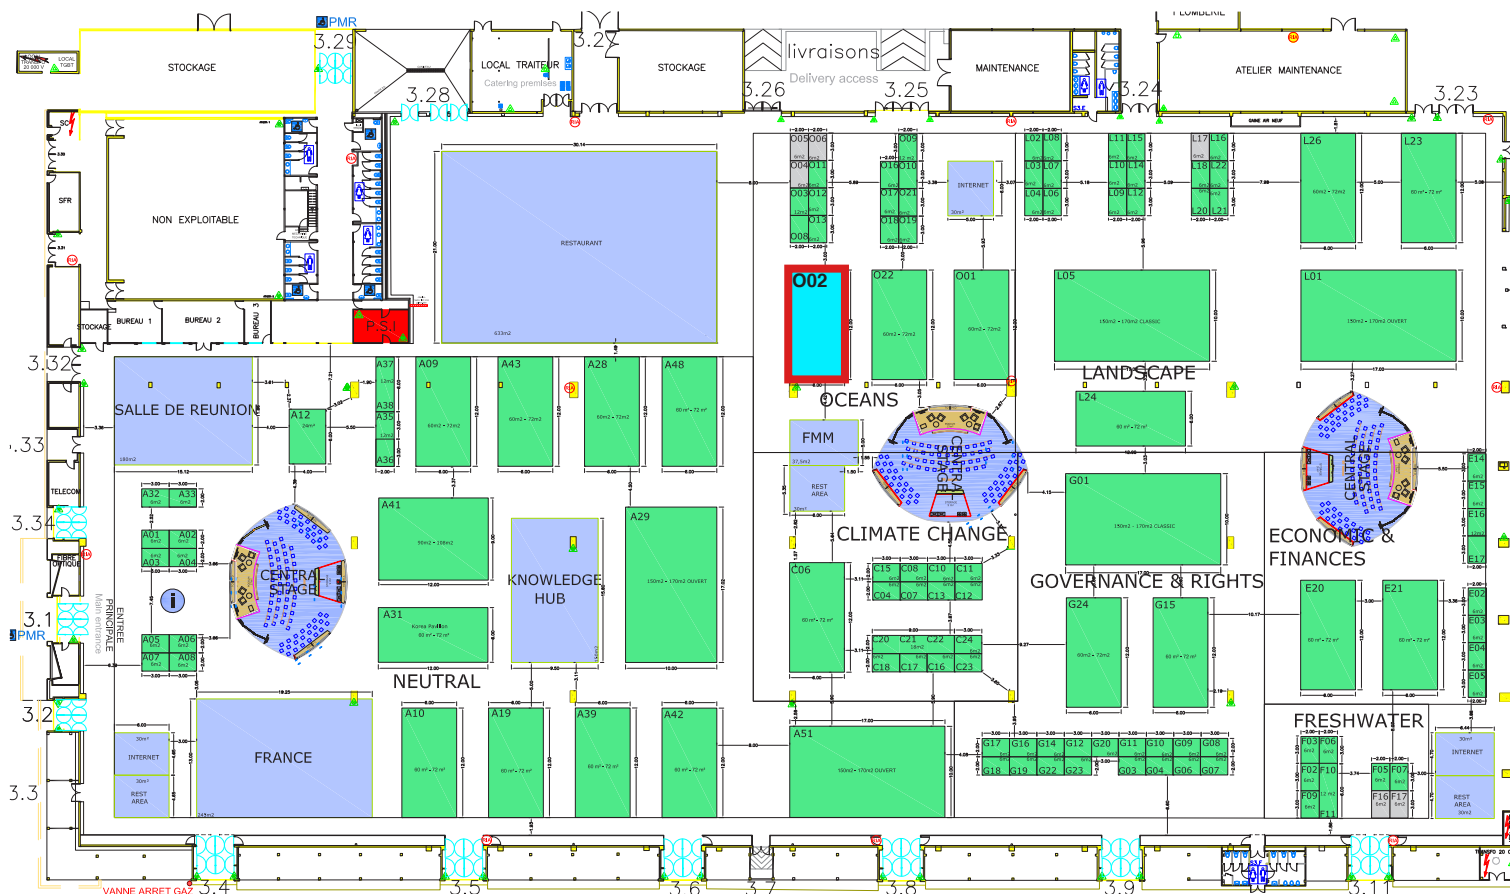

IUCN's marine community - secretariat staff, partners and Commission members working on marine issues across the Union – welcome you to Marseille and wish you a very productive Congress. This Marine Journey has been compiled to provide participants, both those on site and those tuning in remotely, a guide to the 72 marine-related events happening at the IUCN Congress.

Of those, 27 are Forum events and 45 will take place on the various pavilions in the Exhibition Area, including 23 on the Ocean and Islands pavilion. The Ocean and Islands pavilion will be open on the night of the opening and for the duration of the Forum. When there are no events ongoing, you are welcome to come to network and meet marine friends.

The ocean is taking centre stage as one of the key themes at IUCN Congress reflecting its status as one of the key pillars of IUCN's quadrennial programme of work during the period 2020-2023.

We invite you to attend the opening and closing plenaries of the Restoring Ocean Health theme. Distinguished speakers will open the Congress on an engaging and optimistic note, highlighting key trends and opportunities whilst the closing plenary will reflect on highlights from the Forum and will feed ideas into the Marseille Outcomes, the IUCN roadmap for a better future for the natural world and people.
