CONSTITUTIONS, ENVIRONMENT, AND HUMAN RIGHTS:
PRACTICE AND IMPLEMENTATION

Regional Judicial Colloquium for Latin America and the Caribbean

Under the Auspices of the Federal Senate of Brazil – through the Environment Committee and the Joint Senate and House Permanent Committee on Climate Change – and the Global Judicial Institute for the Environment

Brasília, Brazil, 22-23 May 2017

Organized under the auspices of the Federal Senate of Brazil and the Global Judicial Institute for the Environment. Co-sponsored by UN Environment, UN Special Rapporteur on Human Rights and the Environment, the Brazilian Association of Judges (AMB), the Brazilian Association of Federal Judges (AJUFE), the Brazilian Bar Association (OAB - Conselho Federal), the Organization of American States (OAS), the IUCN World Commission on Environmental Law (WCEL), Widener University Delaware Law School (USA), and North-West University (South Africa).

Overview

Environmental constitutionalism has become a critical aspect of global environmental governance and environmental rule of law. This important Judicial Colloquium on “Constitutions, Environment, and Human Rights: Practice and Implementation” will bring together prominent judges and scholars from Latin America and the Caribbean, to be joined by other distinguished international jurists, scholars, and high-level governmental representatives to enrich and enhance comparative perspectives on environmental constitutionalism. They will engage on vital questions, such as jurisdiction and access to courts, enforcement of judicial orders, and related substantive issues focused on constitutional environmental protection.

Emphasis will be placed on procedural matters (standing, justiciability, statutes of limitations, access to courts, *res judicata*), causes of action, remedies (“medidas judiciais”), and how courts are giving effect to substantive constitutional provisions related to environmental protection. The Colloquium will enable the exchange of experiences in advancing environmental constitutionalism through judicial decision-making.

Building on established expertise and diversified experience, this event is part of a larger programme under the leadership of the *UN Special Rapporteur on Human Rights and the Environment* and supported by the United Nations Environment Programme (UN Environment) to enhance judicial capacity in environmental constitutionalism, identify gaps and opportunities, and support judges worldwide. It also takes place
within the framework of the Inter-American Program on Sustainable Development’s priority action of building capacity of key stakeholders including public officials and governmental agents who participate in matters relating to the environmental rule of law and who support effective enforcement of domestic environmental laws, multilateral agreements, and regional agreements. Additionally, the Colloquium is an innovative collaboration initiated by the IUCN World Commission on Environmental Law and the newly created Global Judicial Institute for the Environment (GJIE).

Each of the sessions will be chaired by a member of the Federal Senate of Brazil, which is hosting this event as an official Senate Hearing. The sessions are designed to be iterative and interactive. The UN Environment’s Judicial Handbook on Environmental Constitutionalism, by Professors James R. May and Erin Daly, including cases from jurisdictions in the region and around the world, and other primary and secondary sources, will be provided electronically in advance. The final session – a case study – will integrate all of the previous sessions and participants’ contributions by focusing on practice and implementation of human rights, environmental constitutionalism, and the environmental rule of law in the Amazon Biome.

**Topics**

- The role of judges in protecting the environment, considering such issues as separation of powers, environmental rule of law, and environmental constitutionalism;

- Interpretation and application of environmental provisions in international, regional, and domestic law, with particular attention to constitutional provisions, and how the various layers interrelate with and complement one another;

- Approaches to achieving better access to justice on environmental matters in the region, including costs, standing, interim relief, burden of proof, statute of limitations, remedies, *res judicata*, and enforcement, including the judicial role in coordinating the execution of judgments with other branches of government;

- Progress and challenges in guaranteeing and implementing environmental constitutional provisions in countries of the region;

- Development of new and additional judicial training and educational materials on issues of judicial concern relating to all facets of the implementation of environmental constitutional provisions; and

- The Amazon Biome as a case study of the different concepts and instruments analyzed in the previous panels.

**PROGRAMME**

*Monday, 22 May 2017*

**Opening Remarks**

*Chair: Senator Cassio Cunha Lima (Vice-President, Federal Senate of Brazil)*
SESSION I

**Keynote Addresses: Constitutions and the Environmental Rule of Law**

**Chair:** Senator Jorge Viana (President, Joint Senate & House of Representatives Permanent Committee on Climate Change, Brazil)

**Professor John Knox** (UN Special Rapporteur on Human Rights and the Environment), *The International Framework: The Relationship of Human Rights to the Environment*

**Honorable Justice Antonio Herman Benjamin** (National High Court of Brazil – STJ), *Models of Environmental Constitutional Provisions*

**Honorable José Sarney Filho** (Minister of the Environment of Brazil), *The 1988 Constitution and the Role of the State in and Protecting the Environment*

The keynote session will address the complex interrelationships of the environmental rule of law, human rights, constitutional provisions, the state, and environmentalism. Professor Knox will begin with an overview of the broad international context of human rights and the environment. The following speakers will focus in depth on these issues from the perspective of Brazil, the host country for this Colloquium. Justice Benjamin will provide perspective on the Brazilian constitution by examining other models of environmental constitutional provisions. Minister Sarney will discuss the evolution of the role of the state in protecting the environment, from the 1988 Constitution through the present, providing an important historical perspective for the Colloquium.

SESSION II

**Perspectives and Priorities from the Scientific & Conservation Community**

**Chair:** Senator José Antonio RegUFFE (Federal Senate, Brazil)

**Keynote Address:** President Zhang Xinsheng (IUCN), *Eco-Civilization and Environmental Governance*

**Speakers:**

Kristen Walker Painemilla (Chair, Commission on Environment, Economic and Social Policy, IUCN), *People and Nature*

John Robinson (IUCN Councilor and Vice President, Wildlife Conservation Society), *The Biodiversity Crisis*

This session features distinguished leaders of the International Union for the Conservation of Nature – the world’s oldest and most prominent entity comprised of states and non-governmental organizations devoted to global environmental protection. They will address how the IUCN leads the setting of priorities.
President Zhang Xinsheng will discuss the major role played by the organization in providing critical scientific information and leadership for policy and lawmaking around the world on issues ranging from endangered species to water conservation and climate change. An IUCN Commission Chair and an IUCN Councillor will then explore the world’s conservation crises in their respective areas of expertise.
