A European initiative to foster action in 7 regions of global importance

**Caribbean Region**
- Coral reef conservation and rehabilitation
- Estuaries and mangrove habitats
- Marine species conservation
- Ocean acidification

**Polar/Sub-polar**
- Seabed conservation
- Community-owned monitoring
- Marine-based economy

**Indian Ocean**
- Island dynamics
- Following coastal zones
- Terrestrial and marine biodiversity
- Environmental education
- Fisheries and food security
- Forest protection
- Marine conservation

**Global**
- Global partnerships
- Marine agreement

**South Atlantic**
- Forest restoration & biodiversity
- Educational marine trails
- Environmental education
- Marine spatial planning
- Climate change risk assessment
- Offshore ecological assessment

**Polar/Sub-Polar**
- Identifying important Marine Areas
- Climate change impact monitoring
- Whales and seal research

**Pacific**
- Biological restoration and monitoring of marine protection
- Capacity building and public empowerment
- Conservation of endangered and extinct species and ecosystems (coastal and terrestrial)
- Environmental management systems
- Spatial planning

**Legend**
- EU Overseas Countries and Territories (OCTs)
- EU Outermost Regions (ORs)
- African, Caribbean and Pacific (ACP) group of states and islands of the same regions
- Exclusive Economic Zone (EEZ) of the EU
