From a combined academic and practical background, **Dr. Iza** brings to IUCN a combination of expertise including a broad knowledge of international environmental law, and special focus on water resources and marine law. In his academic career, Dr Iza taught public international law, law of European Integration, environmental risks, and international environmental law. In legal practice, at the European Commission (DG Environment), he specialised in complaints relating to EC environmental law, especially involving nature conservation, environmental impact assessment (EIA), wastes, water resources and pollution. An Argentine national, Dr. Iza holds a law degree from the University of Buenos Aires (Argentina), a Master of Laws Degree from the University of London, a Master of International Relations and International Law from the University of Belgrano (Argentina) and a Doctor of Laws Degree from the University of Buenos Aires.
