

## LIFE EUROPEAN RED LISTS - LIST OF ALL ACTIONS

### A. Implementation actions

Action number:	Name of the action (obligatory):
A1	Prepare a list of all native bryophyte species in Europe
A2	Identify bryophyte Assessors and assign species to Assessors for assessment
A3	Organise Red List and species mapping training workshops for the Assessors of all species groups
A4	Compile preliminary assessments and distribution maps for all bryophyte species
A5	Bryophyte species assessments and maps reviewed through workshops and online consultation
A6	Completion of all bryophyte species assessments and distribution maps, and submission to the Red List Unit for publication
A7	Prepare a list of all native pteridophyte species in Europe
A8	Identify pteridophyte Assessors and assign species to Assessors for assessment
A9	Compile preliminary assessments and distribution maps for all pteridophyte species
A10	Organise one pteridophyte species assessments and maps review workshop
A11	Completion of the pteridophyte species assessments and distribution maps, and submission to the Red List Unit for publication
A12	Prepare a list of selected native saproxylic beetle species in Europe
A13	Identify saproxylic beetle Assessors and assign species to Assessors for assessment
A14	Compile preliminary assessments and distribution maps for the selected saproxylic beetle species
A15	Organise one saproxylic beetle species assessments and maps review workshop
A16	Completion of the selected saproxylic beetle species assessments and distribution maps, and submission to the Red List Unit for publication
A17	Prepare the list of all remaining species of native European terrestrial mollusc species to assess
A18	Identify terrestrial mollusc Assessors and assign species to Assessors for assessment
A19	Compile preliminary assessments and distribution maps for the terrestrial mollusc species
A20	Terrestrial mollusc species assessments and maps review through workshops and online consultation
A21	Completion of the terrestrial mollusc species assessments and distribution maps, and submission to the Red List Unit for publication
A22	Prepare a list of selected native vascular plant species in Europe
A23	Identify vascular plant Assessors and assign species to Assessors for assessment
A24	Compile preliminary assessments and distribution maps for the selected vascular plant species
A25	Organise two vascular plant species assessment and maps review workshops
A26	Completion of the selected vascular plant species assessments and distribution maps, and submission to the Red List Unit for publication

**B. Actions for communication and for dissemination of project lessons (obligatory)**

<b>Action number:</b>	<b>Name of the action (obligatory):</b>
B2	Promote the project throughout its lifespan in IUCN's website, social media and newsletters
B4	Promote the exchange of project information and networking with other LIFE funded projects
B5	Create a web page for bryophytes and pteridophytes on the Europa website
B6	Update the web pages for saproxylic beetles, terrestrial molluscs and vascular plants on the Europa website
B7	Produce publications or fact sheets for each species group
B9	Produce pull-ups and display them at strategic places
B10	Organise an event to disseminate the European Red List results to stakeholders
B11	Organise a press conference, issue a press release and produce press packs on European Red List results
B12	Produce a Layman's report

**C. Project management and monitoring of the project progress (obligatory)**

<b>Action number:</b>	<b>Name of the action (obligatory):</b>
C1	Project management by IUCN
C2	Project meetings
C3	Project reporting
C4	Audit review
C5	Develop an After-Life Plan
C6	Complete the indicator tables (quantitative and qualitative)
