TANZANIA AND ZAMBIA

Support the implementation of Aichi Target 2 by providing information on impacts of climate change on biodiversity and ecosystem services, building capacity of district planners and protected area managers, and effectively mainstreaming biodiversity and climate change into planning processes.

- **TANZANIA** – Mpanda and Nkasi Districts in the Greater Mahale Landscape including Katavi National Park and forest reserves
- **ZAMBIA** – Nsama and Mpulungu Districts hosting Nsumbu National Park and Tondwa Game Management Area

**HIGHLIGHTS**

- Guidance document for integrating biodiversity and climate change aspects at district level in Mpulungu and Nsama District, Zambia
- Protected areas management plans incorporating climate change strategies for Nsumbu National Park (Zambia) and Katavi National Park (Tanzania)
- Integration of climate change and biodiversity aspects in Integrated Development Planning (IDP) Guidelines in Zambia and in Village Land-Use Planning Guidelines in Tanzania
