PART 1 – INSTRUCTIONS TO PROPOSERS AND PROPOSAL CONDITIONS

1.1. About IUCN

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Headquartered in Switzerland, IUCN Secretariat comprises around 950 staff in more than 50 countries.

Created in 1948, IUCN is now the world’s largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,300 Member organisations and some 10,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people’s well-being.

PART 2 – THE REQUIREMENT

Background on the project

Following anticipated approval by the 60th Council of the Global Environment Facility (GEF) and the Government of Kiribati, IUCN will implement the following full-sized project: Securing Kiribati’s Natural Heritage: Protected areas for community, atoll, and island climate resilience (Securing Kiribati)

The proposed project will improve the resilience of ecosystems and communities in Kiribati to the impacts of climate change through nature-based solutions and ecosystem-based adaptation that support biodiversity and sustainable livelihoods. The project will improve integrated environment and oceans governance policy, improve ecosystems that support biodiversity and are resilient to climate change impacts and develop ecosystem-based approaches for climate change adaptation and community resilience through nature-based solutions, including climate smart agriculture and aquaculture.

Concretely, its purpose is:

- Improved integrated environment and oceans governance
- Improved and healthy ecosystems that support biodiversity and are resilient to climate change impacts through improved management of the Phoenix Islands Protected Area and expansion of protected and conserved areas in the Gilbert Island group
- Ecosystem-based approach for climate change adaptation and community resilience through nature-based solutions by developing integrated islands management plans and establishing climate smart agriculture and aquaculture practices

This project will be funded through the Biodiversity area of the GEF Trust Fund and the Least Developed Country Fund, up to USD 11,100,000 and is expected to mobilize USD 19,800,000 in co-financing. The project preparation grant (PPG) available for this project is up to USD 180,000.

**Schedule of Payments**

The detail of the financial proposal is to be submitted in the tables in Section 4. The required details include the daily or weekly rate of each member of the project team, the estimate of the number of days/weeks of input required the unit costs of flights and estimate of the number of flights, and an estimate of the number of days of in country with unit daily subsistence costs.

The total fee estimate will then be used as the basis for the schedule of payments, with expenses recoverable at cost with proof of purchase (bills) and usage (tickets) up to the estimated amounts as a maximum.

The following schedule of payments relates to the total fee estimate only:

- Contract signature: 20%
- Approval by IUCN of baseline studies, draft logical framework and theory of change: 20%
Approval by IUCN of draft proposal (incl. annexes) and CEO endorsement after internal consultation 20%
Approval by IUCN of full project documentation before submission to GEF 20%
Completion of GEF CEO Endorsement 20%

The budget requested for the preparation of the project will have to be aligned with the PPG funds available (see project background in part 2 above)

Travel
The contract will require the Consultant team to travel to the region and the proposed outer islands as agreed with IUCN. It is unlikely that international travel to Kiribati will be possible during this project. Cost of internal travel will be provided in the bid and will have to comply with the IUCN policy on travel.
PART 3 – THE EVALUATION MODEL

The selection criteria will consist of a technical and financial component. A weighting will be provided to each component as follows: Technical Weighting Factor 70%, Financial Weighting Factor 30%, with the total score a combination of these two percentages.

The technical component involves an evaluation of the following eight criteria based upon the information provided in the submitted proposal documentation:

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Methodology and Work Plan</td>
<td>15%</td>
</tr>
<tr>
<td>Experience with GEF or other related donors</td>

</tr>
<tr>
<td>Experience in Pacific natural resources management and ecosystem-based adaptation</td>
<td>15%</td>
</tr>
<tr>
<td>Experience with Pacific climate-smart agriculture and aquaculture</td>
<td>15%</td>

<tr>
<td>Experience in stakeholder consultation, gender-responsive and participatory project design and</td>
<td>20%</td>
</tr>
<tr>
<td>development of safeguard tools and respective consultations in a Pacific context</td>
<td></td>
</tr>
<tr>
<td>Familiarity with Kiribati and/or Micronesia</td>
<td>15%</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>100%</td>
</tr>
</tbody>
</table>

Only proposals which achieve a total score (Technical Score) of more than or equal to a value of 70% will be considered for financial evaluation. Proposals scoring less than 70% will be discarded from the tender evaluation process.

Technical proposals scoring greater than or equal to a value of 70% will be normalised by dividing their percentage by the maximum proposal technical percentage, and converting this value into a percentage to give the Normalised Technical Score.

The financial evaluation will be based upon the full professional fee value submitted in the proposal combined with the estimate of total expenses (travel & subsistence et al.) as defined by the bidder in their proposal. Each proposal price will then be normalised by dividing the smallest bid price value by this proposal’s price, and this value turned into a percentage (Financial Score). Proposals that exceed the available budget will be disqualified.

The Normalised Technical Score will be multiplied by the Technical Weighting Factor, the Financial Score multiplied by the Financial Weighting Factor and the two weighted scores added together to provide a Final Weighted Score for each bid achieving a Technical Score >70%.

IUCN will then enter into contractual negotiations with the bidder achieving the highest Final Weighted Score, as long as all other bid criteria, as laid out in this documentation, have also been met and adhered to.
