# The SDGs Journey

Achieving the conservation imperative for sustainable development

The adoption of the 2030 Agenda for Sustainable Development with its Sustainable Development Goals (SDGs) is a milestone for the conservation community as many of its targets are directly linked to the work of the Union. The SDGs Journey will look at how the long separate conservation and development tracks are converging into a single road to sustainable development.

The SDGs Journey will be presented during a Conservation Case which will both elaborate the 2030 vision of a sustainable world and highlight several events to take place during the Congress Forum which will feature milestones on this SDG journey - Nature-based Solutions to sustainable development challenges which effectively integrate conservation outcomes with social and economic benefits.

# The SDGs Journey

The SDGs represent an opportunity to mainstream biodiversity into policies and practices and improve coordination to address interactions between the SDGs and targets from biodiversity conventions. Importantly, the SDGs represent an opportunity to overcome some of the past challenges which have made global biodiversity outcomes less effective than could have been the case. These include the definition of ambiguous targets, the lack of international coordination in achieving them, and the little consideration of interactions between biodiversity and socio-economic targets.

The Conservation Case dedicated to the SDGs Journey will focus on the 5 Ps' of the SDGs (People, Planet, Prosperity, Peace, Partnerships) and the imperative of achieving conservation targets embedded in the SDGs for more effective sustainable development outcomes, with panel discussions on the role and importance of good policy and the means of implementation of the SDGs.

The SDGs Journey will be presented during the Conservation Case and highlight a selection of events that are relevant to the achievement of the SDGs and the 2030 Sustainable Development Agenda.

The SDGs Journey represents 36 WCC Forum events which will address the SDGs with a focus on the following issues:

- **Biodiversity conservation**
- **Governance**
- **Finance**

*The SDGs Journey is however not a comprehensive list of events relevant to sustainable development and conservation. Use the Congress App to create your own personal journey. The events search function on the Congress Portal is also a very effective tool. See <https://portals.iucn.org/congress/sessions>.*

**Please note:** We strongly recommend that before attending any event, you confirm the timing and location by checking the dedicated web-space, either by clicking on the title of the event below or by searching directly through the Congress portal.
